SEARCHING CONTENT

Basic Search

Locate relevant results based on your search term(s).
Basic search is a good place to start your research.

Advanced Search

Customize your search with more limiting options to target relevant results. You can use advanced search to run complex searches for specific results, or to perform open searches for a broad view of available content.

- **Subject:** Choose this field to search document tags and find results fully focused on your topic. Try subject if your basic search produces too many results.
- **Publication Title:** Use this option to find articles or documents from a particular publication like *The New York Times*.
- **Entire Document:** Pick this field to search within the entire text of documents. This option performs a broad search for any mention of your terms, so you can find precise phrases within results, or locate articles that touch on specific concepts.
- **Search Operators:** Use these drop-downs to connect your search terms. **AND** ensures your results mention both terms. **OR** broadens your search to results mentioning either term. **NOT** excludes a term.
